

Name of the project:	Feasibility Study for Developing Clean Development Mechanism (CDM) for Claiming Carbon Credits for Leach Pit Toilets And Toilet Linked Bio Gas Plants
Program Area:	Climate Change
Country:	India
Project Length:	December 2007 – June 2008
Sponsor:	UNICEF
Contact:	sriskandh@winrockindia.org

Objective:

The study will assess whether the leach pit toilets, bio gas plants and solid and liquid waste management technologies that include composting, vermi composting, bio- gas plants come under the purview of CDM, the quantum of reduction in green house gas emission and the feasibility of preparing a Project Idea Note (PIN) for initiating proposal for approval of CDM Executive Board.
